About the Company

- ▶ **VIDYA GEOMATICS SOLUTION** the most leading Organization in the field of Land Survey, Mobile Mapping solutions, Drone mapping and laser scanning solutions

VIDYA GEOMATICS SOLUTIONS

The trusted name for Survey Engineering Solutions

VIDYA GEOMATICS SOLUTION is a pioneering Survey Engineering Company in **INDIA** established in the year of 2019, **VIDYA GEOMATICS SOLUTION** Survey Engineering built on a strong work ethic, honesty and a commitment to relationships. **Today VIDYA GEOMATICS SOLUTION** is one of the leading organizations in the field of Land Surveying, Underground Surveying, 3D Laser Scanning Surveying, GIS as well as Geographic Surveys which has International Standard and Quality. We have achieved a solid reputation for providing conscientious and reliable engineering survey solutions to a wide range of infrastructure, construction and development projects for Clients, Government Sectors, Consultants & Constructions Companies in India With more than 6 years of experience, **VIDYA GEOMATICS SOLUTION** continues to improve its heritage by strengthening its dedication & sincerity to each & everyone.

Our Mission and Vision

Gaining customer satisfaction by delivering high quality products and services.

Mission

VIDYA GEOMATICS SOLUTION aims to become the customers' most preferred choice by achieving excellence in quality and delivering value-added projects on time. The company is committed to providing the highest level of service in the construction industry, offering superior craftsmanship in every project it undertakes.

Vision

VIDYA GEOMATICS SOLUTION aims to establish itself as a leader in the local construction industry. With a strong commitment to our clients and our craft, we are dedicated to delivering the quality work you deserve while helping you reduce costs.

Why choose us ?

Do you know why people are choosing Falcon Survey for their Construction needs? here is why;

Honesty, Integrity and Trust

This is integral to every practice and decision in the business. Our reputation depends on it.

Client Orientation

Developing great relationships with our clients is key to our success. We work closely with our clients so we can fully understand and respond to their individual needs.

Innovation

Our innovation is what sets us apart, whether we are offering a unique product or challenging our methodology to become more effective.

Quality

We are committed to quality at every level of the business. We understand there is no compromise on this and we continually invest in technology, staff development and health and safety to ensure we achieve the highest standard of service.

Professional Approach

We operate worldwide and our access to skilled and specialist resource allows us to respond effectively no matter the size of the project or how challenging.

Land Surveying Mapping Services

VGS employs a full-time team of professionals, allowing us to offer a comprehensive range of surveying services. Our expertise includes boundary and topographic surveys, construction stake-out, and monitoring. We specialize in delivering topographic mapping services, producing both 2D and 3D topographic maps according to specific projection requirements. Our maps detail contours, 3D surface features, roads, relief, and planimetric elements for projects of all scales. Our 3D topographic map delivery includes raster-to-vector conversion and ortho photo feature extraction. We accurately capture features such as building rooftops, contour lines, boundary lines, transportation infrastructure, fences, trees, water bodies, vegetation, habitations, and forest areas.

VGS utilizes advanced GIS and CAD mapping software, including AutoCAD and ArcGIS, to extract and process these features.

Land Surveying

VGS employs a dedicated team of professionals to deliver a comprehensive range of land surveying services using advanced tools like Total Station, DGPS, Digital Level, and Auto Level. Their services include:

- Topographical surveys
- Demarcation and boundary setting out
- OGL (Original Ground Level) survey
- Excavation quantity calculations
- Establishing benchmarks and control points
- Setting out pile foundations
- Pile As-Built surveys
- Column and footing marking
- Grid line marking
- As-Built surveys of existing structures and during construction stages
- Verticality checking
- Comprehensive construction-related survey services

VGS leverages advanced GIS and CAD mapping software, such as AutoCAD and CIVIL 3D, to extract and process detailed features efficiently.

Tunnel Surveying

VGS employs a full-time professional staff to provide a comprehensive range of tunneling surveying services. These include tunnel profiling, traversing with triangulation methods, and wriggle survey report monitoring. Key services offered are:

- Precise Alignment Control
- Base Network Establishment
- Support for Tunnel Boring Machine (TBM)
- Deformation Monitoring
- Cross-Sectional Measurements:
- Laser Scanning
- Traverse and Triangulation
- Staking Out and Setting Out
- Integration with BIM
- Final As-Built Survey (wriggle survey)

VGS utilizes advanced software such as NRG, TBC, and Amberg tunneling software to deliver these services efficiently.

Track Surveying

VGS employs a full-time professional staff to provide a comprehensive range of track surveying services. These include total station Digital Level and Track Master Key services offered are:

- Alignment and Geometry Control
- Establishing Control Points
- Track Centerline Staking
- Vertical and Horizontal Curve Measurement
- Rail Gauge Verification
- Super-Elevation and Cant Measurement
- Trackbed Leveling and Grading
- Switches and Crossings Turnout
- Deformation and Settlement Monitoring
- Final As-Built Survey

VGS utilizes advanced software such as NRG, TBC, and Amberg leica software to deliver these services efficiently.

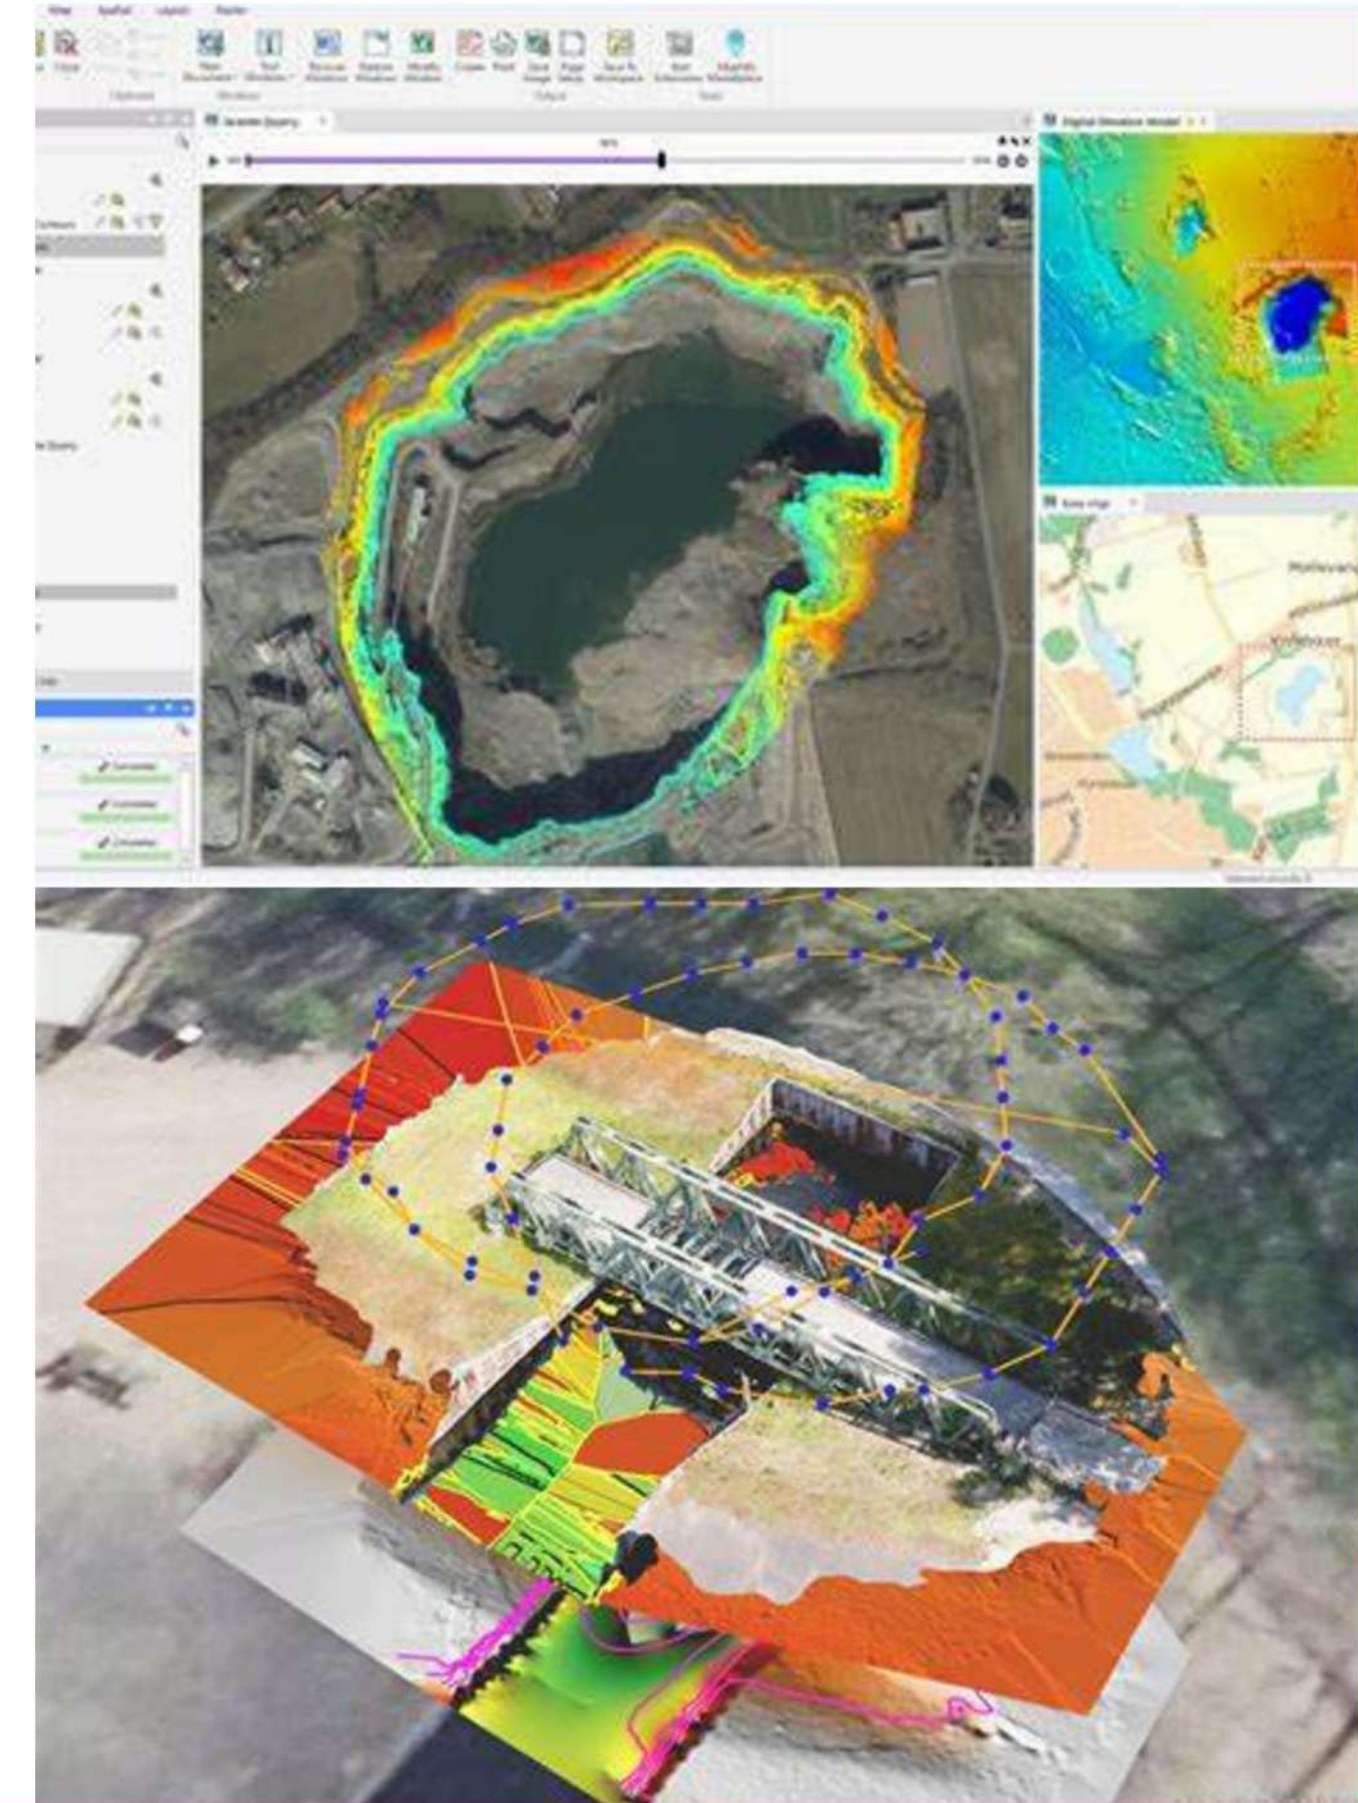

Aerial Drone Mapping

VGS employs a full-time professional staff and state-of-the-art equipment, including a diverse fleet of UAVs, to provide a comprehensive range of aerial survey services. Their UAVs, such as the DJI RTK 300, Mavic 3 Enterprise, and Phantom 4 RTK, enable precise aerial drone mapping. Key services include:

- Construction update surveys
- Mining and aggregates monitoring
- Solar energy site inspections
- Infrastructure inspections
- Roofing inspections
- Agricultural inspections
- Urban planning and land management
- Archaeological surveys
- Land surveying

DJI's advanced drone technology, including the Phantom 4 RTK, delivers centimeter-accurate data with fewer ground control points. The drones achieve 1cm+1ppm RTK horizontal positioning accuracy, 1.5cm+1ppm RTK vertical positioning accuracy, and a 5cm absolute horizontal accuracy of photogrammetric models when flying at 100m height with 2.7cm GSD on sunny days.

3D Laser Scanning As-Built Surveying

3D Laser Scanning

Vidya Geomatics Solution (VGS) employs a full-time professional staff and utilizes cutting-edge 3D laser scanning technology to accurately capture the shape of objects using laser light, creating precise 3D models of geographic features. This advanced method offers numerous benefits, including Key services offered are:

- Industrial Applications
- Volume Calculations
- Infrastructure Applications
- Architecture Applications
- Archaeological/Heritage
- Energy
- Registered Point Cloud
- 3D CAD Models
- 3D Mesh Models
- BIM Models
- 2D CAD Documentation
- Plant Design Models
- Orthophotos
- Deformation Surveys
- Volume Survey
- Clash Detection
- 3D Virtual Reality
- Panoramic Images
- Leica TruView

As Built Surveys

Vidya Geomatics Solution (VGS) employs a full-time professional staff skilled in 3D laser scanning and As-Built Total Station technology to accurately capture geographic features and monitor project progress through 2D and 3D models. This advanced method offers numerous benefits, including the following key services:

- As-Built Survey of Existing Buildings
- Production of Floor Plan Drawings
- Production of Sectional Drawings
- Production of Elevation Drawings
- Production of Cloud Points
- 3D Modeling of Buildings
- BIM (Building Information Modeling)
- AutoCAD Modeling

Geo Technical Investigation

VGS leverages its geotechnical engineering expertise to help clients save time, money, and resources. Capable of conducting fieldwork in even the most remote areas, VGS offers boring services that reach depths of 30-100 meters. The company provides client-specific reports with comprehensive data to support decision-making and project foundation design. Key services include:

- Geotechnical investigation (onshore/offshore)
- Chemical and biological laboratory analysis
- Physical and mechanical testing
- Nondestructive testing services
- Environmental testing
- Geophysical testing
- Evaluation of existing structures
- Geological mapping
- Special testing services
- Oil spill monitoring

VGS ensures the highest standards by utilizing the latest, most advanced field equipment and processing data with the industry's most powerful modeling software.

Rental Services

Vidya Geomatics Solution (VGS) offers technical consultancy and manpower services, including the rental of skilled survey teams. Their services include:

- Supplying surveyors on a daily, weekly, monthly, or yearly basis
- Providing survey teams (surveyor with assistant) on a daily, weekly, monthly, or yearly basis
- Supplying survey engineers
- Providing draughtsmen

VGS ensures clients have access to qualified professionals and teams tailored to their specific project needs, whether short-term or long-term.

Health and Safety

Vidya Geomatics Solution is deeply committed to health and safety. Our policies and procedures are designed to protect our staff, contractors, and the public at all times.

Our OH&S system includes:

- Occupational Health and Safety Policy
- Comprehensive induction for all new employees
- Detailed Occupational Health and Safety Procedures
- Accident and Incident Reporting and Monitoring
- Safety Inspections
- Monthly staff meetings
- Safe Work Method Statements (SWMS) for fieldwork
- Online induction program for new employees, with yearly refreshers.
